New Delhi, India | luthrarishit1234@gmail.com | +91 8587815662

PROFESSIONAL SUMMARY

Results-driven Insurance Business Analyst & AI Developer with hands-on experience in AI-driven automation for the Insurance and Broking domain. MCA candidate at GGSIPU with a 9.5 GPA, combining deep expertise in Machine Learning, Full-Stack Development, and No-Code platforms. Experienced in architecting C# backend logic, designing intelligent AI agents, and managing the complete solution lifecycle from requirement analysis through deployment. Proven ability to bridge cutting-edge AI capabilities with scalable, enterprise-grade business solutions.

WORK EXPERIENCE

Insurance Business Analyst & AI Developer | [White Gate Consulting](#) | Singapore (Remote) Jan 2026 – Present

- Engineered bespoke AI agents for Insurance & Broking, automating complex workflows including policy assistance, lead qualification, and client query handling to significantly enhance operational throughput.
- Architected C# backend logic and API integrations, ensuring high-performance execution, stability, and enterprise-grade scalability across insurance platforms.
- Managed NFR-to-Production migrations and cross-functional PMO initiatives, ensuring system resilience, compliance, and timely delivery of automation frameworks.

Data Science Intern | [MeriSkill](#) | New Delhi Jan 2024 – Feb 2024

- Analyzed HR Analytics dataset to identify workforce trends, providing actionable insights to support HR strategy implementation.
- Developed a diabetes prediction model using historical medical data, improving accuracy in early risk detection through ML techniques and data preprocessing.

Data Analysis Intern | [CodSoft](#) | New Delhi Sep 2023 – Oct 2023

- Actively participated in data analysis projects, collaborating with the team via virtual communication tools to ensure efficient project delivery and accurate outputs.

EDUCATION

Master of Computer Applications (MCA) 2024 – 2026

Guru Gobind Singh Indraprastha University – IITM, New Delhi **GPA: 9.6 / 10**

Relevant Coursework: Artificial Intelligence, Database Management, Full Stack Development, Cloud Computing, Advanced Python Programming.

Bachelor of Computer Applications (BCA) 2021 – 2024

Guru Gobind Singh Indraprastha University, New Delhi **GPA: 9.4 / 10**

Relevant Coursework: Machine Learning, Artificial Intelligence, Python, Data Structures, Web Development, DBMS.

12th Grade – Commerce with Informatics Practices 2020 – 2021

Indraprastha World School, New Delhi **GPA: 9.2 / 10**

PROJECTS

AI Agents for Insurance & Broking — Tech: Creatio AI, C#, REST APIs

- Designed and deployed AI-powered agents using Creatio AI to automate end-to-end insurance and broking workflows including policy assistance, lead qualification, and client query handling.
- Integrated intelligent business rules and backend C# logic to enable compliance validation and real-time decision support within automated workflows.

ClauseFlow AI – Intelligent Contract Generation & Management Platform — Tech: Next.js, React.js, Node.js, MongoDB Atlas, Tailwind CSS, Ollama

- Built a full-stack AI-powered platform for automated legal contract generation, supporting multiple contract types including NDA, Service Agreement, Lease Agreement, and Partnership Agreement.
- Integrated local AI models via Ollama for unlimited free contract generation; implemented smart drafting with customizable clauses, risk analysis, contract history, and secure authentication.

One-Stop Personalised Career & Education Advisor — Tech: Python, ML, Full Stack

- Developed a full-stack platform integrating machine learning models to design aptitude tests and a recommendation system to suggest suitable courses and colleges based on test results.

Image Caption Generator — Tech: TensorFlow, Computer Vision, NLP

- Built a deep learning model trained on the Flickr 8k dataset to generate contextually relevant image captions by combining computer vision and natural language processing techniques.

Deep Face Detection Model — Tech: TensorFlow, CNN, Albumentations

- Designed a CNN-based face detection model leveraging TensorFlow and the Albumentations library for data augmentation, achieving high accuracy across diverse image datasets.

Lip Reading Model — Tech: TensorFlow, Keras, Sequence Modeling

- Built a model combining computer vision and sequence modeling to detect spoken words from lip movements, enabling accurate interpretation of visual speech input.

Customer Segmentation Using Clustering — Tech: Python, Scikit-learn

- Segmented mall customers using clustering algorithms, identifying distinct spending behaviors and interest profiles to support targeted marketing strategies.

School Dropout Prediction — Tech: Python, Machine Learning

- Predicted student dropout rates using machine learning on academic datasets, identifying critical influencing factors to aid in the design of preventive intervention strategies.

TECHNICAL SKILLS

AI & Machine Learning: Machine Learning, Deep Learning, Agentic AI Automation, Prompt Engineering, NLP, Computer Vision

Development: Full Stack Development (React.js, Next.js, Node.js, Express.js), Python, C#, REST API Integration

Databases & Cloud: SQL, MongoDB, MongoDB Atlas, PostgreSQL, DBMS

Platforms & Tools: Creatio AI, Ollama, Tailwind CSS, Prisma ORM, Git

Languages: English (Expert), Hindi (Native), French (Beginner)

LEADERSHIP EXPERIENCE

President | Artificial Intelligence Experience Center (AIEC), GGSIPU – IITM | New Delhi 2025 – 2026

- Led a core team of 100 members to organize large-scale technical events, ensuring smooth execution and cross-departmental collaboration.
- Directed planning and hosting of Techno Sapiens, a flagship college event engaging over 1,000 students, overseeing logistics, resource allocation, and scheduling.
- Enhanced AIEC's visibility within the institution by driving AI awareness initiatives and fostering a culture of innovation and knowledge-sharing among members.

RESEARCH EXPERIENCE

Researcher | Institute of Information Technology & Management, GGSIPU | New Delhi 2024 – 2025

- Conducted research on Semantics-Aware Malware Detection, improving detection accuracy by integrating semantic analysis with machine learning techniques.
- Developed a Deep Face Detection Model using convolutional neural networks, achieving high accuracy across varied image datasets.
- Documented and presented research findings, contributing to advancements in cybersecurity and computer vision domains.

AWARDS & ACHIEVEMENTS

- Secured 1st Position in college-level Machine Learning Competition.
- Selected twice for participation in Smart India Hackathon (SIH).
- Recognized as MCA University Topper for outstanding academic performance.
- Achieved distinction as BCA College Topper with consistent academic excellence.
